Degradable Glycine-Based Photo-Polymerizable Polyphosphazenes for Use as Scaffolds for Tissue Regeneration

S. Rothmund, T. B. Aigner, A. Iturmendi, M. Rigau, B. Husár, F. Hildner, E. Oberbauer, M. Prambauer, G. Olawale, R. Forstner, R. Liska, K. R. Schröder, O. Brüggemann and I. Teasdale
Macromolecular Bioscience, 2014

Preparation of polyphosphazenes: a tutorial review

S. Rothmund and I. Teasdale
Chemical Society Reviews, 2016, DOI:10.1039/c6cs00340k

Biodegradable Polyphosphazene Based Peptide-Polymer Hybrids

A. Linhardt, M. König, W. Schöfberger, O. Brüggemann, A. Andrianov and I. Teasdale
Polymers, 6, 2016, 8, 161

Macromolecular Pt(IV) Prodrugs from Poly(organo)phosphazenes

H. Henke, K. Kryeziu, J. Banfić, S. Theiner, W. Körner, O. Brüggemann, W. Berger, B. K. Keppler, P. Heffeter and I. Teasdale
Macromolecular Bioscience, 2016

Polyphosphazene Based Star-Branched and Dendritic Molecular Brushes

H. Henke, S. Posch, O. Brüggemann and I. Teasdale
Macromolecular Rapid Communications, 2016, 37, 769

Books

Polyphosphazenes for Medical Applications

I. Teasdale and O. Brüggemann
A Smithers RAPRA, Shrewsbury, 2014
ISBN: 978-1-90903-088-6

Oral Presentations:

Brüggemann O., Teasdale I.:
Die Anwendungsvielfalt bioabbaubarer Polyphosphazene, 23.10.2014.
Biopolymere und Biocomposites 2014, Linz, Austria

Brüggemann O., Teasdale I.:
Polyphosphazene als biodegradierbare Scaffolds für das Tissue Engineering, 20.11.2014
Biomaterialien 2014, Würzburg, Germany
